

Etna and the Alcantara Valley are enchanted places, to be covered at a slow pace. During the different hours of the day, from dawn to dusk, they offer a kaleidoscope of soft and intense colors to capture with your camera. Let's go on foot, together with our guide and expert photographer of the territory of Etna and the Alcantara Valley in search of the most beautiful and particular points. From the black sands of Etna, to the bright yellow of the typical brooms of the warm seasons, from the varied colors of the typical Mediterranean scrub to the volcanic rocks, from the clear waters to the blue sky, not to forget the splendid breathtaking landscape and the starry night skies. There will be stops in shelters, visits to historical sites and tastings of wine and typical local products that will make you appreciate this pearl of the Mediterranean to the fullest.
