

Nature and history meet in the several valleys of Trentino region: our journey will bring us to discover ancient typical villages, hidden in minor valleys and surrounded by beautiful forests. Between Lake Garda and the typical alpine landscape, the characteristic medieval villages are unique, with their traditions, ancient buildings, antique stones, old barns, all of them a significant heritage of traditions, handed down generation by generation. Not only: we will also discover the minor farming communities, so that we will better understand how life was since 2000 BC; the archaeological area of Fiavè is included within the UNESCO world heritage site, described as a "Prehistoric Pile dwellings around the Alps".
